

How to find us

Stenson Boatbuilders have built over 500 narrowboats at Stenson since 1986. Some of our boats have been used for many years as residential boats and provided us with the experience of developing craft which are comfortable and energy efficient. Our designs have evolved to provide deceptively spacious interiors while still allowing a full width double bed, plenty of storage and comforts which are essential for a narrowboat lifestyle.

Visitors are always welcome at Stenson. The family boat building business also operate Stenson Marina, the Stenson Belle trip boat, and the Stenson Lock Coffee Shop - providing an interest for all the family. Stenson staff are available to discuss your boating requirements and offer our guidance based upon many years of involvement in the Inland Waterways industry.
